## IoT/M2M-optimized LTE-A Cat 12 M.2 Module

Quectel EM12-G is an LTE Advanced category 12 module optimized specially for M2M and IoT applications. Adopting the 3GPP Rel-12 LTE technology, it delivers M2M-optimized speeds of 600 Mbps downlink and 150 Mbps uplink peak data rates. Designed in the M.2 form factor, EM12-G is compatible with Quectel Cat 6 module EM06 , which will facilitate customers to migrate between different categories.

EM12-G is designed for global and nearly covers all the main stream carriers worldwide.

EM12-G, optionally, supports Qualcomm® IZat™ location technology Gen9HT Lite (GPS, GLONASS, BeiDou, Galileo). The integrated GNSS greatly simplifies product design, and provides quicker, more accurate and more dependable positioning capability.

A rich set of Internet protocols, industry-standard interfaces and abundant functionalities (USB drivers for Windows 7, Windows 8/8.1, Windows 10, Linux, Android/eCall, etc.) extend the applicability of the module to a wide range of M2M and IoT applications such as industrial router, home gateway, STB, industrial laptop, consumer laptop, industrial PDA, rugged tablet PC, video surveillance and digital signage, etc.
